SERVICE PLAN OPTIONS:

AUTO - BASIC

There are no additional charges to use this plan. All camera settings are setup in the camera. The email address and/or cell phone number the photos need to be sent to are entered in the camera. One email address or cell phone number can be stored in the camera. Once all the settings and the email address / phone number is entered in the camera, it can be switched to "ON" to begin taking and sending photos!

PREMIUM

An upgrade from the basic Auto service, the Premium option is separate from the carrier data plan and as such is a separate charge. The first month of this service is free. After the first month, the cost is \$3 - \$4 a month per camera depending on how many months are prepaid for.

What Premium offers that Auto does not:

- The Spartan App for iPhone or Android, and an account at www.spartancamera.com, both of which will receive the photos taken by the camera.
- The ability to remotely change the settings in the camera from both the App and the website. This is especially handy if the cameras are deployed more than a couple of hours away.
- Up to 5 email addresses and/or cell phone numbers can be used with the Premium service. Premium credits are needed to keep the camera working on the premium service, 1 credit is needed per month per camera.
- You can purchase them by going to the Shop Menu > Buy Credits3
